

A PRINTER HAVING A THESAURUS FEATURE

ABSTRACT OF THE DISCLOSURE

1
2
3 A print apparatus having a thesaurus feature includes a processor
4 and a memory for storing a thesaurus program. The print apparatus may
5 further include a display unit and a control panel so that a user may access the
6 thesaurus program while stationed at the print apparatus. Alternatively, the
7 print apparatus may be coupled to a computer network and may operate like a
8 server computer to allow user access to the thesaurus from any of a number of
9 computers that are also coupled to the network.
